PROFESSIONAL SUMMARY

Java Full-Stack Developer with 1+ year of hands-on experience (training + internship) at Placement Adda Training Institute and Dollop Infotech, Indore. Have built and shipped 2 industry projects — Worksphere, a live full-stack employee workplace platform, and the PSchool Institute Onboarding & Management System (completed and deployed) — covering everything from database design to deployment. Skilled with Spring Boot, React.js, JWT-secured REST APIs, WebSocket, Redis caching, and Kafka messaging pipelines. Comfortable across the full stack: RESTful backend design, JWT-secured APIs, real-world frontend development, and SQL/PostgreSQL/MySQL databases. Actively seeking a role where I can contribute to scalable, real-world software products from day one.

WORK EXPERIENCE

Software Developer Intern (Java) — Dollop Infotech Pvt. Ltd., Indore Jan 2026 – Present

- Delivered 2 industry projects during the internship: PSchool Institute Onboarding & Management System (Mar 2026 – May 2026) and Worksphere employee workplace platform (Jun 2026 – Present, live).

Worksphere – Employee Workplace Platform (Jun 2026 – Present, live)

- Designing and building Worksphere, a live full-stack workplace platform, developing both frontend and backend end-to-end.
- Built core modules including daily updates, real-time chat, leave management, mail, and company announcements.
- Developed WebSocket-based real-time chat and notifications for Worksphere, a live production application.

PSchool Institute Onboarding & Management System (Mar 2026 – May 2026)

- Designed and delivered a multi-tier institute management platform handling enquiries, step-based document onboarding, contract management, and admin approval workflows.
- Built end-to-end document/media upload flows with validation and Super Admin verification dashboards for reviewing and approving onboarding requests.
- Implemented role-based access control for admin, staff and applicant roles using Spring Security and JWT.

Across both projects

- Developing clean, layered backend modules using Controller, Service, Repository, DTO, and centralized Exception Handling.
- Integrating Spring Security and JWT-based authentication to secure REST API endpoints.
- Built RESTful APIs with request validation, consumed by a React.js frontend.
- Designed MySQL schemas and Hibernate/JPA data access layers for scalable data handling.
- Using Git/GitHub for version control while exploring Redis caching and Kafka messaging pipelines to improve performance and scalability.
- Collaborated using Git/GitHub with code reviews in an Agile/Scrum workflow.

Training — Java Full Stack Development, Placement Adda Training Institute, Indore Jun 2025 – Dec 2025

- Completed Java Full Stack Development training covering Core Java, OOPs, Collections, Exception Handling, Multithreading, JDBC, Spring Boot, Spring MVC, Spring Security, REST APIs, JWT authentication, React.js, and MySQL.
- Developed real-time projects including PhoneBook Directory, Job Portal, Expense Tracker Application, and Sales Tracking & Management System.
- Worked with layered architecture including Controller, Service, Repository, DTO, Entity, Exception Handling, and Utility layers.
- Practiced API development, validation, authentication, authorization, CRUD operations, pagination, filtering, and database integration.
- Used Postman and Swagger/OpenAPI for API testing and documentation.
- Built a Sales Tracking & Management System using Spring Boot, React.js and PostgreSQL, with Redis caching and Apache Kafka event-driven processing.
- Implemented BCrypt password hashing, role-based access control and audit logs to secure user data and track actions.

EDUCATION

B.Tech — Samrat Ashok Technological Institute, Vidisha (M.P.) Jun 2020 – Jun 2024

Certifications: IoT Certificate, PLC Certificate, Placement Adda Full Stack Training Certificate

TECHNICAL SKILLS

- **Languages & Core:** Java, C, JavaScript, OOPs, Collections, Multithreading, File Handling, Exception Handling
- **Frameworks & Web:** Spring Boot, Spring MVC, Spring Security, Microservices Basics, React.js, Angular, HTML5, CSS3, Bootstrap
- **Tools & Architecture:** REST APIs, JWT, Apache Kafka, Postman, Swagger/OpenAPI, Maven, MVC, Layered Architecture
- **Databases & Caching:** SQL, MySQL, PostgreSQL, Redis, JDBC, Hibernate/JPA
- **DevOps & Cloud:** Docker basics, GitHub Actions (CI/CD), AWS basics, Cloudinary
- **Deployment & Hosting:** Vercel, Hostinger, AWS (EC2)
- **Version Control & Collaboration:** Git, GitHub, Agile/Scrum basics, Code Reviews
- **Real-Time & Messaging:** WebSocket, Apache Kafka, Event-driven Design

PROJECTS

Worksphere – Employee Workplace Platform (Live, in Production) Jun 2026 – Present

Live Link: https://worksphere.dollopinfotech.com

- Architected and built a live, production-grade full-stack workplace platform for the IT industry end-to-end, owning both frontend and backend from design to deployment.
- Built core workplace modules — daily updates, real-time chat, leave management, mail, and company announcements — used daily by employees in production.
- Designed a layered Spring Boot backend (Controller, Service, Repository, DTO, Exception Handling) and secured all REST endpoints with Spring Security and JWT-based authentication.
- Implemented real-time features using WebSocket for live chat and notifications, and structured MySQL schemas with Hibernate/JPA for scalable data access.
- Developed supporting pages including Privacy Policy, Terms & Conditions, and FAQs, along with several other in-progress modules, while iterating on the product based on real user feedback.

Tech Stack: Spring Boot, Spring Security, JWT, React.js, WebSocket, MySQL, Hibernate/JPA, Git

PSchool Institute Onboarding & Management System — Full-Stack Project Mar 2026 – May 2026

- Designed and shipped a multi-tier institute management platform handling enquiries, step-based document onboarding, contract management, and admin approval workflows, delivered and deployed.
- Built end-to-end media/document upload flows with validation, and integrated Super Admin verification dashboards for reviewing and approving onboarding requests.
- Implemented role-based access so admins, staff, and applicants each get a tailored workflow, backed by a clean Spring Boot + MySQL data layer.

Tech Stack: Spring Boot, Spring Security, JWT, React.js, MySQL, Hibernate/JPA, Git

Sales Tracking & Management System — Full-Stack Project Nov 2025 – Feb 2026

- Developed a full-stack system to streamline leads, deals, sales targets, and roles across sales teams.
- Implemented secure login with BCrypt password encryption, granular role-based access control, and audit logs for tracking user actions.
- Optimized performance using Redis caching for frequently accessed data and Apache Kafka for asynchronous, event-driven processing of sales updates.
- Documented all REST endpoints with Swagger/OpenAPI for easy integration testing and handoff.

Tech Stack: Spring Boot, Spring Security, React.js, PostgreSQL, Redis, Kafka, Swagger/OpenAPI

Job Portal Application — Web Project Aug 2025 – Oct 2025

- Created a web-based portal engineering separate, custom workflows for job seekers and recruiters, including job posting and application status tracking (Pending/Shortlisted/Rejected).
- Built the backend using Servlet, JSP, and JDBC on an MVC architecture, with MySQL for persistent storage of jobs, applications, and user profiles.

Tech Stack: Java, Servlet, JSP, JDBC, MySQL, MVC Architecture, Eclipse

PhoneBook Directory & Contactless Switch — Desktop & Automation May 2025 – Jun 2025

- Built a contact management desktop application utilizing core Java OOPs concepts and JDBC for persistent storage.
- Developed an automation hardware switch using Arduino Uno and sensors for touchless electronic device control, bridging software logic with real-world IoT hardware.

Tech Stack: Core Java, JDBC, Arduino Uno, Sensors, IoT Concepts
